### ALLDATA PRO Database

Having car trouble but you don't want to waste money on a mechanic when you can try to fix it yourself? Or maybe you don't know very much about cars, but you want to make sure you don't overpay when you take it to the mechanic. ALLDATA Pro is an online resource that provides automotive diagnostic and repair information for vehicles manufactured between 1982 and the present. It contains similar content to a Chilton manual, but is searchable and more up-to-date.

ALLDATA PRO is organized into four main sections:

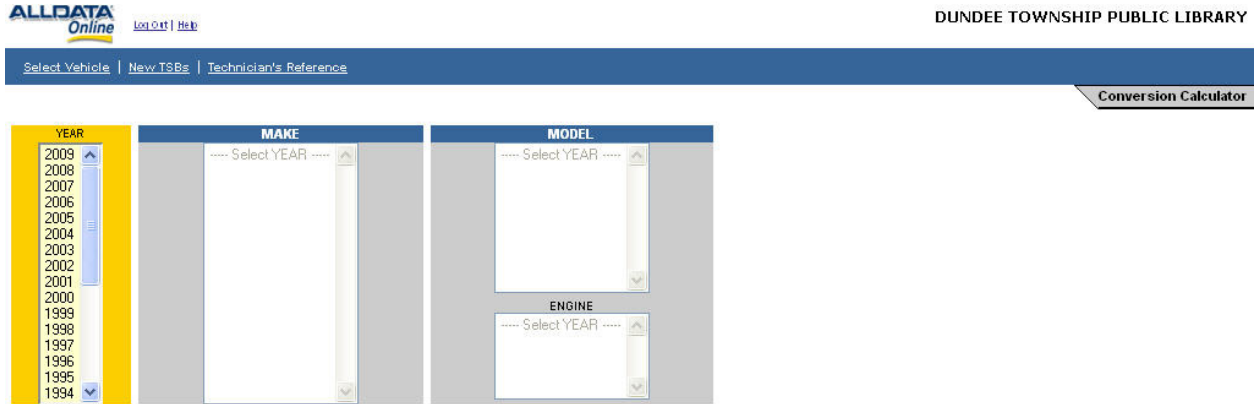

Scheduled ALLDATA® Online Tech Updates		
Update:	Start	End
Server Maintenance	No maintenance scheduled	

⇒ Vehicle Information: contains vehicle and component level diagnostic and repair information for cars taken from manufacturer service manuals. **Includes: maintenance information, diagnostic trouble codes (DTCs), Technical Service Bulletins, specifications (electrical, mechanical, capacity, etc.), diagrams, and locations of components.**

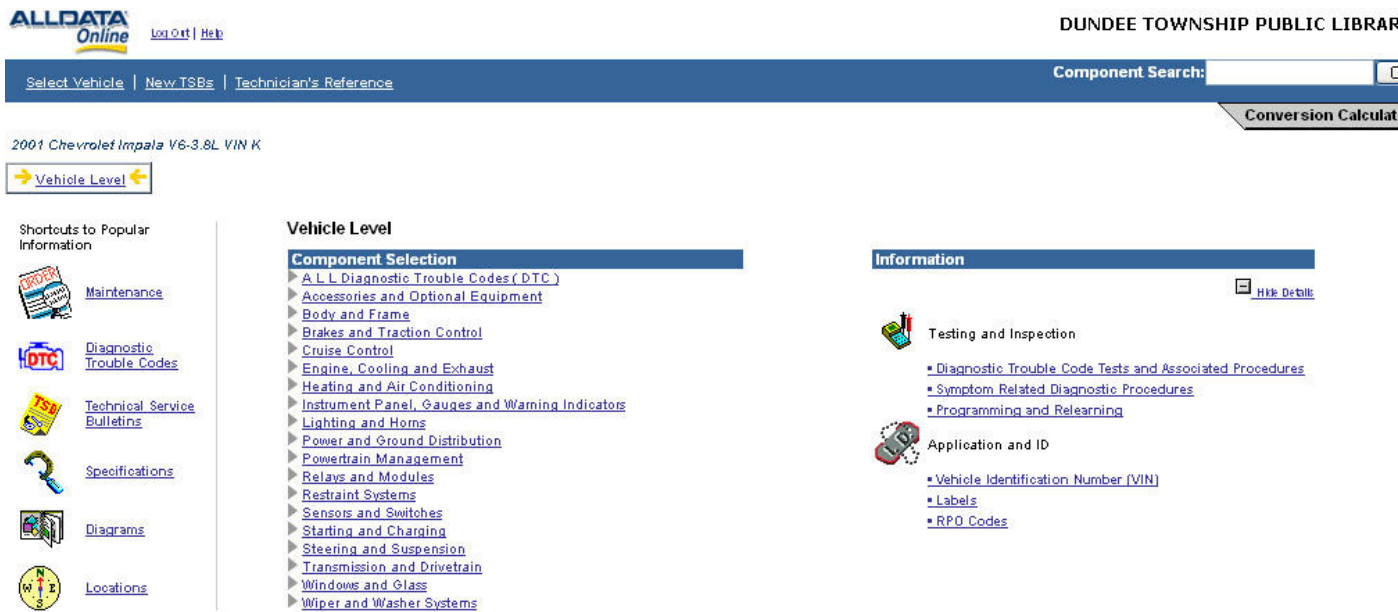

- ⇒ Technical service bulletins (TSBS): Recommend procedures for repairs on vehicles not included in the service manual. Recall notices are also located here.
- ⇒ Shop Operations: Information for shop owners and service advisors. **Includes: timing belt service intervals; inspection forms, system checklists, and customer questions; and information on the Motorist Assurance Program (MAP).**
- ⇒ Technicians Reference: Quick reference resources for car repair and maintenance. **Includes: timing belt service intervals; time pressure monitor reset procedures; emissions quick reference guide; conversion tables and formulas; a glossary and tech tips.**

More below....

**Searching in ALLDATA PRO:** To find information on a particular car hit “Select Vehicle.” Then select the appropriate year, make, model, and engine.

Once you select a vehicle, you can either search for a particular component by selecting a link listed below “component selection” or type what you are looking for in the “component search” box located in the upper right hand corner.

Additional Features: ALLDATA PRO has a conversion calculator that allows you to convert different units of measurements relating to area, distance/length, force, pressure, temperature, torque, vacuum, volume and weight. The calculator can be found in the upper right hand corner of the “select vehicle” and “vehicle level” pages.
